PRISTINE DIVING AT YOUR FRONT DOOR

Take a walk on the greener side of Grand Cayman and find Lighthouse Point — nine oceanfront condominiums uniquely constructed with green technologies.

Don't let the stunning, old-Caribbean architecture and large balconies fool you, Lighthouse Point is registered as a member of the U.S. Green Building Council. Its green amenities include solar/wind-power and low-wattage lighting, on-demand water heating, state-of-the-art sewage treatment, on-site recycling bins, and solid wood interiors, among many others.

Individual condos include a kitchen with stainless-steel appliances, washer, dryer, dishwasher and microwave; dining room with choice of hard-

wood floors or ceramic tiles; master bedroom with walk-in closet and bathroom; guest bedroom with bathroom; along with cable and Internet. You can also enjoy the homemade delicacies of Lighthouse Point's own bistro.

Explore Grand Cayman's newest shore diving and snorkeling site with PADI 5-Star Resort Divetech, this signature development's on-site dive shop. Just off Lighthouse Point's 40-foot private dock, you will find an abundance of marine life, as well as easy access to wall dives. Equipment rental including nitrox tanks are available.

So, live lightly on the planet and savor the luxuries of the ultimate natural environment that is Lighthouse Point — opening February 2009.
